

B BATCH

PROJECT 1: ONLINE TUITION MANAGEMENT SYSTEM (KEFIN BENNY)

The Online Tuition Management System connects admin, teachers, and students on a single platform where the admin controls and monitors all activities. The admin manages classes and subjects, verifies teachers and students, and oversees enrollments and payments. Teachers register, get verified, add their teaching services, conduct online classes, and track student requests and payments. Students register, browse available classes and teachers, enroll in courses, make payments, attend online classes, and provide feedback.

STATUS

- Completed Admin side
- Completed Guest side
- Registrations & logins
- Stakeholder 2 processing
